

Speaker Introduction

- Dr. Anthony Richiez (*pronounced richy-ez*) has been developing dynamic teaching techniques from time he was “**bored to death**” by his schoolteachers...until his latter days in college.
- Since that time, he has **helped numerous teachers** change the way they approach teaching.
- When he worked for the K-12 school system, he helped his students **improve their test scores** by 132%.
- When he was a Dean, at the collegiate level, he created a dynamic teaching system called “**TeachCraft**” that helped his faculty improve the teaching effectiveness of the entire college.
- Dr. Richiez claims that he was a ***terrible middle school student*** and can’t even remember the names of his high school teachers....
....this is why he went on to develop his **unique** perspective of **Dynamic Teaching**.
- Prior to working in education, Dr. Richiez worked at the World Trade Center, studied martial arts for almost 40 years and is an avid hiker and former scoutmaster.
- Please give a warm welcome to Dr. Anthony Richiez!!
